

Hybrid Cloud Monitoring

Hybrid Cloud Monitoring

This section reviews *GroundWork Cloud Hub*, a data collector agent specialized in gathering metrics from a variety of virtual environments and integrating them seamlessly into the GroundWork Monitor Enterprise system.

GroundWork Cloud Hub currently supports the virtualization environments *Amazon AWS*, *Cloudera*, *Docker*, *Icinga 2*, Microsoft Azure, NeDi, *NetApp*, *OpenStack*, *Red Hat Enterprise Virtualization (RHEV)*, and *VMware vSphere*. For Net Hub there is currently the *OpenDaylight ODL* connector.

For detailed information expand  **Hybrid Cloud Monitoring** in the navigation pane or select from the links below:
